- www.BerkshireDIG.org.uk

Overview

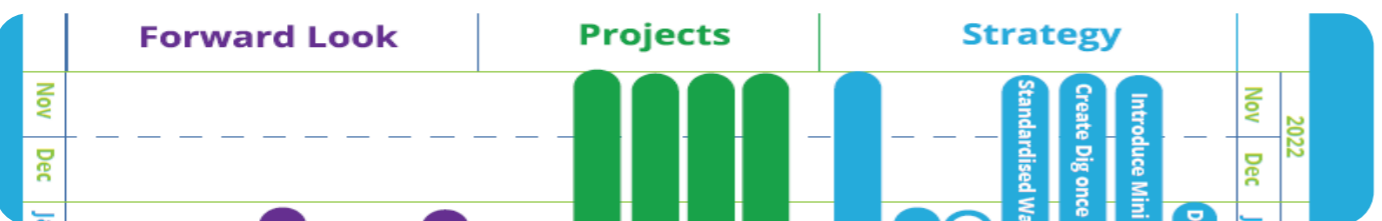

The Digital Infrastructure Group (DIG) Roadmap has been developed to show what work has happened so far, what projects are in progress and to show other elements across Government and Berkshire, working with our Local Authorities (LA), will be used to help us develop a Connected Berkshire.

The different 'swimlanes' on the Roadmap help us quickly identify the work/planned work/opportunities and show chronologically how they overlap.

- Strategy
- Projects
- Forward Look

How to use this document

The roadmap can be used to show when key tools will be available, when projects are starting or finishing, and also help keep track of those key Government initiatives.

Strategy

Work that aligns to the DIG objectives and targets. These work to provide Local Authorities with the skills and tools to be able to engage with projects and the market/Mobile network operators in a consistent way.

Projects

This shows projects that have started work and been allocated active resource. Our projects help us to deliver our objectives and aims of creating a Connected Berkshire.

Forward Look

Items under the forward look are opportunities to help develop digital infrastructure across Berkshire, as well as key Government targets or initiatives that align to our overall approach.
